

QUESTBACK ESSENTIALS

WINTER 2019/2020 RELEASE

PART #2

OSLO, JAN 2020 (V34.2)

DESIGN – new landing page for CREATE QUEST

WHY

We aim to provide a feedback solution that allows you to get started with your feedback initiatives in no time.

You need to have access to all available choices in an intuitive and easy-to-use form, and the option to create and manage short-cuts and get quick access to the work that is most relevant for you!

WHAT

Our new landing page **CREATE QUEST** features:

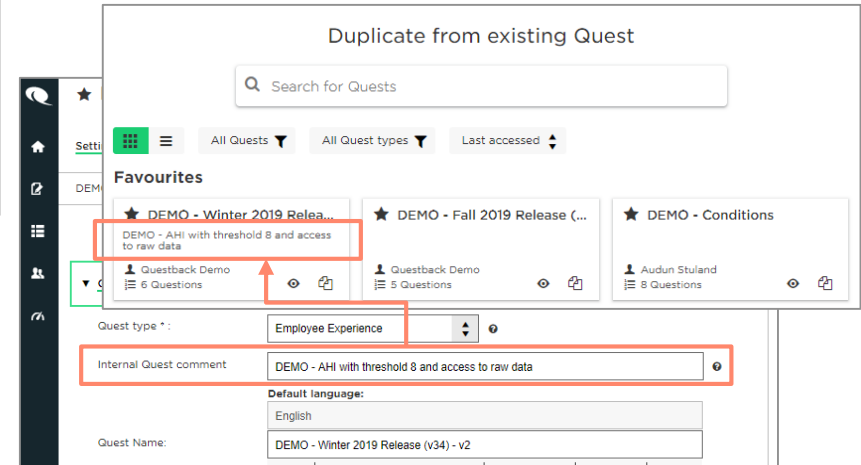

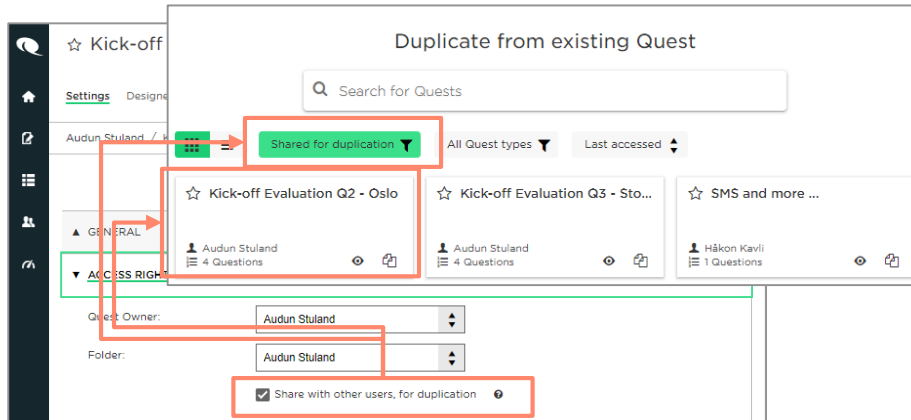

- Complete overview with all available options displayed in one place, incl. quick access to practice templates, your own favourites plus quests created and shared by your colleagues
- Interactive drill-down and search function to find your starting point
- Intuitive wizard to preview and select the correct templates or survey

BENEFITS

- Improved user experience, with significant efficiency gains in your daily work with feedback.
- Personalized and customized landing page with short cuts to the surveys that are most relevant for you

ACCESS RIGHTS – new flexibility “shared for duplication”

WHY

We aim to offer a feedback solution where you have full control over all your feedback activities and with whom of your colleagues you would like to share what.

WHAT

Our new option “share for duplication” adds a new dimension to manage access right down to a very granular level:

- NEW – grant access via “share for duplication”: your colleagues see your quests in the new landing page when creating a quest, and can make a copy if it (= only copy the quest settings, questions, language versions plus invitation content). All results and follow-up activities are not affected and remain private and only accessible to you!
- EXISTING – grant access via “share folders” (): your colleagues get full access to your quest(s), incl. the results under reporting and follow-up and the right to do own reporting, analysis and follow-up work.

Last but not least: each quest has a new field for internal comments, for you to easily manage different versions of your quests, and/or to inform your colleagues about the versions when sharing them!

BENEFITS

Even more options for you to keep control about who has access to which part of your feedback work.

Straight forward to find the quest of your choice, with the newly placed search function that includes international comments as well!
